Re: Recurrent Ventral Hernia Repair

On January 18, 2012 I was operated on by Dr. Sulkowski for a recurrent ventral hernia and am happy to report that he did an excellent job. From beginning to end, he thoroughly explained all that this new procedure would entail and there were no surprises.

I am very happy with the results and the healing process has gone much quicker than I thought it would. Having had experience with Dr. Sulkowski before, I already had confidence in his skills and now, even more so.

I would highly recommend him to anyone who is in need of this or a similar procedure.
